

New Homes Program

Exciting Offer for WCMES Homebuilders

It's New

The New Homes Program was redesigned by TVA and local power companies to offer a suite of new HVAC and water heating equipment incentives. These incentives are available for all-electric homes, as well as homes that have gas appliances. The incentives are offered for both single family homes and multi-family homes.

It's Easy

To be eligible for incentives, homes must be new (less than one year old), built to prevailing local code, and have qualified equipment installed.

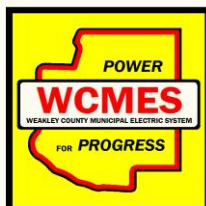

- A certified inspection will be conducted on all qualifying homes.
- There's minimum paperwork.
- No ENERGY STAR requirement.

It's Rewarding

The incentivized technologies are highly desired for their efficiency, effectiveness and longevity, which makes homes more marketable. Additionally, participating home builders can receive the added marketing benefits of taking part in a program sponsored by TVA and WCMES
